OTM-EXP-FB-ADDON	OnTheMap	Facebook	Annual	€ 2.160,00
TLY-CS-CORE	Software as a Service - Annual License - Core module	Tellya (formerly Emil.io) is a platform that provides the tools necessary for the end-to-end management of projects related to virtual assistants and their lifecycle. Through an administration console and dedicated modules Tellya allows the definition of conversational and process flows through the integration of ready-to-use connectors to NLU engines, such as Google Dialogflow, and response editing tools that the virtual assistant. These conversational flows can be used to define multi-channel customer journeys optimized for the dispensing touchpoint. Tellya also provides tools necessary for agent training and organization of the training team. The performances are monitored analytically and through specific KPIs it is possible to evaluate which parts of the basic know-how of the virtual assistant are ready for production.	Annual	€ 16.200,00
TLY-CS-ADVA	Software as a service - Add On "Advanced Analytics" - Annual License	Advanced analytics add on module for defining funnels, cohort and displaying session flows	Annual	€ 5.400,00
TLY-CS-FLOW	Software as a service - Add On "Flow Design" - Annual License	Add on module for the graphic realization of conversational flows	Annual	€ 2.160,00
